In addition to suffering the worst loss in income, Hispanic households are the first to lose health insurance, a "hidden crisis" in the economy that goes unnoticed. A group embrace to cope with tragedy

By Christine Mendiola

John de la Cruz, a 40-year-old father of three, was in the middle of a long drive home from work when he was involved in a fatal accident. He was killed on the spot.

When a loved one dies, it's a tragedy. But for John, it was a tragedy that was compounded by the fact that he was a father of three.

John's wife, Maria, was left with three children. She was devastated by the loss of her husband.

2012 review Spain, Messi assert global football might

It was a year of global football, with Spain's national team winning the World Cup in Brazil and Lionel Messi leading Argentina to the Copa Libertadores in Argentina. The year also saw the emergence of new stars like Cristiano Ronaldo and Neymar Jr. in Brazil, and the continued dominance of the Brazilian national team in South America. The year ended with the Copa Libertadores final, where Messi's Argentina defeated Cruzeiro 2-0 to win the trophy.

Streaking Clippers manhandle Celtics

The Los Angeles Clippers defeated the Boston Celtics 108-85 in a lopsided victory on Tuesday night. The Clippers, led by Blake Griffin, who scored 28 points, dominated the game from the start. Griffin also had 10 rebounds and 5 assists. The Celtics, led by Paul Pierce with 22 points, struggled throughout the game. The Clippers' defense was particularly effective, holding the Celtics to a season-low 85 points.

The Clippers' victory was a significant boost to their confidence as they continue their push for a playoff spot. The Celtics, on the other hand, are looking for a way to turn things around. The game was a clear display of the Clippers' offensive firepower and defensive discipline.

CLIMATE CHANGE PROPERTY
 When it comes to climate change, the property market is not immune. The impact of climate change on the property market is a complex issue that involves many factors, including rising sea levels, increased flooding, and more frequent and severe weather events. These factors can lead to a decrease in property values and an increase in the cost of insurance and maintenance. As a result, property owners and developers are increasingly looking for ways to mitigate the impact of climate change on their investments.

The Arctic and Antarctic in Hong Kong

The Arctic and Antarctic are two of the most remote and mysterious places on Earth. They are places where the sun never sets or never rises, and where the temperatures are so low that even the hardiest of animals struggle to survive. In Hong Kong, the Arctic and Antarctic are brought to life through a series of exhibits and performances. The exhibits show the beauty and danger of these regions, and the performances tell the stories of the people who have explored them. It is a chance to learn about these fascinating parts of the world and to appreciate the incredible diversity of life on Earth.
